

1. opened Amazon website find out to
2. different function.

Q:- return 1 & return 0 is what and
main return to whom.

Answers:

- | | |
|-----------------------|----------------------|
| 1A) 1) Product search | 7) payment options |
| 2) Add to cart | 8) reviews |
| 3) Buy Now | 9) filter |
| 4) wishlist | 10) delivery address |
| 5) your orders | 11) cancel order |
| 6) account | 12) product details |

2A)

⇒ return 0 indicates successful
program execution, and returns control
to the OS.

⇒ return 1 → indicate unsuccessful
execution (or an error) and returning
control to OS

* main () returns to the OS
